**Classroom to Boardroom Solutions to Address New and Emerging AI**

When implemented properly, AI can have a highly positive impact within a school system — from classroom to boardroom. In this presentation, Dr. Daggett will share how many of the nation's most rapidly improving school districts have leveraged the power of AI to operate more efficiently and effectively, which has given teachers, staff, and administrators more of their time back on nights and weekends. Dr. Daggett will also share the dramatic and rapidly evolving impact AI is having on the workplace. Fundamental changes in the ways businesses operate are leading to a major shift in the skills, knowledge, and dispositions that employees will increasingly need to have to thrive in their jobs. Students, too, will need to develop these same skill sets to be prepared for success in all aspects of life, work, and society after graduation. Dr. Daggett will explain how many cutting-edge districts are using the outcomes and recommendations of a newly released national study of these new and emerging skills to build capacity from classroom to boardroom so that their students are prepared to thrive in a world that is driven by AI.

**When**

Thursday Feb 1, 2024 · 10am – 11am (Mountain Time - Denver)

**Guests**
