META Members,

I would like to invite you all to take part in our end of the year Regional Meeting and sample some of wonderful interactive flat panels and other interactive technology for your classrooms. We have done some extensive research on the pros and cons of each device and their costs and will share it for each device. We will be having the meeting on Friday May 20th at 4:30pm at the Tech Building located at [915 South Ave, Missoula](#). Right next to Sentinel High School. I have also invited a couple of vendors to answer any questions you might have on their panels. We will also be discussing Esports and other Regional educational technology topics. I have listed below the technology that we will have set up for individuals to play with and see our district's discoveries when working with the tech.

1. SMART Interactive Flat Panel
2. Promethean Interactive Flat Panel
3. Newline Interactive Flat Panel
4. Samsung Flip Interactive Flat Panel
5. LG 70' commercial display paired with a Touch Podium (Allows the instructor to face the classroom when dictating)
6. Business Grade Samsung 70' display paired with an Apple TV and iPad (allows a more mobile touch option)
7. iPevo and Okio, and Inswan Document Cameras

Please let me know if you would like to attend virtually and I will send you an invite with the link. Thank you everyone for all you do for your schools and students!!!! Hope to see or hear you on the 20th.
