Resolution #15-01- SPECIAL EDUCATION FUNDING, CLOSING THE GAP

WHEREAS, review of recent legislative funding increases for K-12 education will clearly show there has been, and continues to be a significant “gap” between increases in revenue provided general education versus increases provided special education;

WHEREAS, the 2015 legislature provided no increase in funding for special education services, this lack of additional revenue from the state places increasing pressure on districts to use local revenue to fund special education services;

WHEREAS, because districts and cooperatives are not receiving an increase in special education revenue, the effect on districts’ includes reducing services to special education children placing districts at risk of failing to provide FAPE (Free Appropriate Public Education), places special education in the position of “competing” for local funding with general education, sports, and other activities, and places an increasing burden on local tax payers;

BE IT RESOLVED, that SAM will develop a proposal to present to their educational partners, the Office of Public Instruction, and the Governor’s office, to “close the gap” in funding increases for general education versus special education.
